Guaranteed nutrient delivery.™

FAST FACTS

- Extra support for joint and muscle health.
- Recover more quickly from exercise, sports or other physical activities.
- Enhance my body's natural healing processes.

vollara®

RE: FLEX^{SPORT}

AN ALL-NATURAL FORMULA TO
SUPPORT MUSCLE & JOINT HEALTH

WELLNESS LIFESTYLE

Dietary Supplement

RE:FLEX SPORT

The muscle and joint discomfort associated with an active lifestyle is hard to ignore. For relief, try Vollara's Re:Flex Sport. Re:Flex Sport is a proprietary blend of enzymes, powerful herbs, and antioxidants specifically formulated to support muscle and joint health. Re:Flex Sport provides highly concentrated proteolytic enzymes, including bromelain, for temporary relief of inflammation. These enzymes are combined with powerful herbs like Boswellia, which have been used for centuries in herbal medicine to support the body's healing processes. In addition, Re:Flex Sport provides a potent combination of antioxidant nutrients to help the body fight the free radicals released after an injury or exercise. At the heart of Vollara's all-natural Re:Flex Sport is CAeDS®, an exclusive nutrient delivery system for maximum effectiveness.

BENEFITS:

- Naturally and effectively supports the body in repairing tissue following an injury.
- Promotes faster recovery from exercise and competition.
- Helps maintain healthy muscles and joints.
- Encourages production of the body's own powerful antioxidant enzyme – SOD – for faster recovery.

ABOUT VOLLARA

You've always heard we are what we eat... NOT TRUE... we are what we ABSORB! Air, water and nutrients are all vital to our health and what we absorb is the key. Vollara technologies offer complete health choices; to purify the air you breathe and the surfaces you touch, enrich the water you drink, support your immune system and strengthen your body. Our in-house team works closely with our esteemed Medical & Scientific Advisory Board who test and research every component of our technology to ensure we are delivering solid, best-in-class products. Welcome to a new way to live healthy. Welcome to Uncompromising Health™ by Vollara.

RE:FLEX SPORT

AN EFFECTIVE NATURAL FORMULA TO SUPPORT MUSCLE AND JOINT HEALTH

WHAT MAKES RE:FLEX SPORT SUPERIOR?

Vollara's Re:Flex Sport is the first dietary supplement Certified for Sport by NSF, ensuring a safe and effective supplement for athletes and all individuals who need extra support for muscle and joint health.

- First dietary supplement Certified for Sport by NSF.
- Supplies a powerful combination of natural herbs and proteolytic enzymes that support muscle and joint health.
- Supplies a unique combination of potent antioxidant ingredients – grape seed extract, turmeric and lycopenes – to nutritionally support the body's healing processes and aid recovery.

RE:FLEX SPORT

Following an injury or strenuous physical activity, the body needs extra nutritional support to repair damaged tissues, fight free radicals released after an injury or exercise, and augment the body's natural healing systems. The proprietary blend of enzymes, herbs and antioxidants in Vollara's Re:Flex Sport nutritionally supports the body's healing processes - and with CAeDS®, each nutrient and herb is delivered to the cells and tissues that need it.

THE CAeDS® DIFFERENCE

CAeDS® is a highly sophisticated nutrient delivery system that ensures the rich nutrients in Vollara products are absorbed and delivered to the cells of the body. The powerful combination of Vollara's premium quality ingredients, advanced formulations, and a cellular nutrient delivery system makes it virtually impossible for any other nutritional product to match the effectiveness of our products. Simply put, CAeDS® provides maximum effectiveness.

Guaranteed nutrient delivery.™

- Includes an exclusive SOD Precursor System that supplies the "building blocks" necessary for the body to make its own powerful antioxidant – SOD (Super Oxide Dismutase).
- Includes a proprietary blend of protease enzymes to help combat the effects of strenuous activity.
- Includes a custom-formulated Chelate Activated Enzyme Delivery System (CAeDS®) ensuring the nutrients in this supplement are delivered to the cells of the body for maximum effectiveness.
- Natural, highest quality ingredients, and completely vegetarian.

Supplement Facts

Serving Size 3 Capsules
Servings Per Container 28

Amount Per Serving		% DV
Zinc (as TRAACS® zinc glycinate chelate)	1.0 mg	7%
Selenium (as selenium glycinate complex)	79 mcg	113%
Copper (as TRAACS® copper glycinate chelate)	0.0036 mg	2%
Manganese (as TRAACS® manganese glycinate chelate)	0.45 mg	23%
<i>Boswellia serrata</i> (resin) Extract	405 mg	†
Protease 4.5	93495 HUT	†
Bromelain	1980000 FCCPU	†
Re:Flex Sport Proprietary Blend	706 mg	†
Turmeric (root), Feverfew (aerial part), Grape Seed Extract, Protease 6.0, Catalase, Protease 3.0, Lycopenes (5%), SOD Precursor System Precursor System (TRAACS® Zinc Glycinate Chelate, TRAACS® Manganese Glycinate Chelate, TRAACS® Copper Glycinate Chelate) Selenium Amino Acid Chelate		
CAeDS® for Re:Flex Sport	126 mg	†
TRAACS®calcium glycinate chelate, Pectinase, Lipase, Amylase, Cellulase, L-Cysteine HCL, TRAACS® magnesium glycinate chelate, glucoamylase		

Other Ingredients: Vegetable capsule, silicon dioxide, magnesium stearate.

RE:FLEX SPORT

AN EFFECTIVE NATURAL FORMULA TO
SUPPORT MUSCLE AND JOINT HEALTH

RE:FLEX SPORT TECHNICAL INFORMATION

Inflammation is a natural reaction to injury or infection. Unfortunately, the body is not always equipped to deal with the stress associated with injury, infection and inflammation. Excessive free radical production in inflammatory conditions can deplete the body's antioxidant stores and overtax the body's healing systems, delaying recovery and tissue repair. Specific nutrients and natural herbs can support the body's natural healing processes in conditions of stress or pain associated with athletic or acute injury and aid recovery from exercise. Vollara's Re:Flex Sport provides a proprietary blend of enzymes, powerful herbs and antioxidants specifically formulated to nutritionally support the body's healing processes.

Boswellia Serrata:

Boswellia, a close relative of frankincense (*B. sacra*), has been used for many thousands of years as an astringent. Modern researchers have found that boswellia's healing properties come both from its antioxidant capabilities and its unique ability to inhibit the production of leukotrienes (chemical messengers of the immune system).

Protease:

Protease enzymes break down large protein molecules into smaller proteins and amino acids. As a natural part of healing, proteins can build up in an area of injury. Protease assists in breaking up waste protein in the area of injury. By breaking up waste protein, protease enzymes support the natural healing processes and efficiency of the body in rebuilding damaged areas.

Bromelain:

Bromelain is a special combination of protease enzymes derived from pineapple. In addition to its general protease effects, bromelain has been shown to modulate the chemical messengers of the immune system (cytokines and prostaglandins). Bromelain has also been researched for its unique ability to reduce exercise-induced muscle injury thereby improving recovery from exercise.

Proprietary Blend:

The Re:Flex Sport Proprietary Blend provides specific enzymes, herbs and minerals to nutritionally support the body's healing systems. This exclusive blend includes:

- Turmeric, a special herb grown in India, China and Southeast Asia that has been used traditionally in herbal medicine for bruises and other injuries.
- Feverfew, like Boswellia, is an herb with analgesic properties due to its ability to inhibit the synthesis of various prostaglandins associated with pain.
- Grape seed extract, one of the most powerful antioxidants available, helps protect tissues from free radicals.
- Additional proteases, providing a full range of protease activity, ensure that waste proteins in the area of injury are completely broken down allowing the body's natural healing processes to occur.
- Lycopene's unique structure and biologic properties make it a potent antioxidant that has been shown to help improve recovery from exercise and support the body's natural healing processes.
- Patented amino acid chelated selenium complex supplies the most bioavailable source of selenium helping to restore selenium levels, which are depleted during injury or exercise.

SOD Precursor System:

Interestingly, the body already contains the most potent and powerful antioxidant available: super oxide dismutase (SOD). The body's ability to produce enough SOD during injury conditions is diminished. Supplementation may help to restore SOD levels. Unfortunately, supplemental SOD is often destroyed in the digestive system and is poorly absorbed when taken orally. However, based on research by Dr. Harvey Ashmead, Re:Flex Sport provides a way for the body to have more of this natural free radical fighter. Re:Flex Sport includes exclusive SOD Precursors, or what might be called SOD "building blocks," which provide the body what it needs to produce its own SOD.

Consult a physician before taking if you are taking any medications.
